

CARECLEAN POTASSIUM HYDROXIDE

Concentrated Potassium Hydroxide flakes to boost cleanings

DESCRIPTION

Careclean Potassium Hydroxide is concentrated Potassium Hydroxide in solid form. It can be used to boost cleaning solutions or stand alone cleaning solution.

ADVANTAGE

- Effective boost on wide range of cargoes
- Enables cleaning at lower temperatures

APPLICATIONS

Tank Cleaning

Careclean Potassium Hydroxide can be used in recirculation or direct injection applications. After discharging, prewash the tanks with seawater, preferably at a temperature of 60°C. Prepare a cleaning solution inside the tank which has to be cleaned. Depending on contamination, add 1% Careclean Potassium Hydroxide as a booster. The solution can be used in a range of 10 - 80°C. Start circulation. Continue circulation for about 2-4 hours. The product has very limited foaming properties. Flush tank with water and drain the tank.

DOSAGE

Recirculation/direct injection 1 %

APPROVALS

- IMO approved in accordance with MEPC 590 Guidelines
- Major coating manufacturers. Deviations in temperature, exposure time and concentration to the above stated can vary per coating type, consult the coating manufacturers user guidelines.
- For use on Marine Line coatings, max. 1% dilution at 60 degrees C for 2-4 hours as a standalone cleaner

***For detailed information on safety and health, please refer to the Material Safety Data Sheet MSDS and/or product label.
