CARE**

CARETREAT Bio DPC

Biological cleaner for drains and pipes, leading to black and grey water tanks. Breaks down organic waste such as grease and fat.

- Environmental friendly
- Biodegradable
- Enzymatic
- Reduces smell
- Prevents from clogging

DESCRIPTION

Caretreat Bio DPC is highly concentrated bacteria-enzymes mixture to clean the drains and pipes coming from sinks, toilets and showers. The enzymes convert the harmful organic matter into smaller particles, that are consumed by bacteria. The bacteria convert the sludge into carbon dioxide and water. Caretreat Bio DPC can be applied to sanitary pipelines to prevent them from clogging.

ADVANTAGE

- assists in keeping drains, traps and lines clean and clog free
- pH neutral and therefore not harmful to the system
- used to replace aggressive cleaners
- maintains the system in optimum operational condition

APPLICATIONS

Caretreat Bio DPC can be applied directly to galley and sewage facilities (e.g. toilets, sinks, showers, and scuppers) as a pH neutral cleaner. Caretreat Bio DPC replaces harsh acid, caustic and bleach based products which are all highly harmful to the normal operation of any biological system.

Caretreat Bio DPC can be used on micro- and ultrafiltration systems.

Date of issue	02-06-2022	Page	1 of 2

DIRECTIONS FOR USE

Caretreat Bio DPC performs within a pH range of 5,5 - 8,5 and a temperature range 10 - 40 °C. Extremes of pH and temperature, as well as wide shifts in either parameter over a short period of time should be avoided.

When used as a cleaner about 100 ml of product should be applied to each bowl, sink and drain in the same manner as with any conventional type cleaner. Note: When used as a cleaner, Caretreat Bio DPC will achieve the maximum results partly due to eliminating line blockage.

DOSAGE

See directions for use.

DOSING SYSTEMS

Marine Care offers a complete range of dosing systems for injection of Caretreat Bio DPC.

REMARKS

- Store in cool, dry place (5 - 40 °C)
- Keep container closed when not in use
- do not use in combination with acids, alkali products, bleach or other disinfectants
- Wash hands after using the product
- Keep away from children

For detailed information on safety and health, please refer to the Material Safety Data Sheet MSDS and/or product label.
